1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 26-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Kunihisa et al. (5,445,713).

3. Applicant's arguments filed 3/11/02 have been fully considered but they are not persuasive.

**In response to the rejection of claims over Kunihisa et al. applicants argue:**

**In Kunihisa, each in the series of wire sections that apply additional plies of fiber suspension to previous layers are all located beneath the felt belt, not above it.**

This argument is not persuasive. It is submitted that the names of the belts in Kunihisa et al. may be arbitrarily chosen and thus if item 4 of Figure 2 is assigned as the "first belt" then additional plies are applied above the belt as claimed. Further, it is noted that when this orientation is considered, claims limitations previously indicated allowable appear to be anticipated by the reference.

With respect to the Watanabe reference, it is submitted that applicants comments are correct. The examiner was interpreting the forming to begin at "9n" in section B of Figure 3. But col 7, of the reference clearly indicates that the forming starts at "9" in section B. Therefore the rejection over this reference has been withdrawn.
